Medical School Panel

Featuring: Danielle Ebben, Mike Oldenberg, Dhaval Desai, Joseph Hippensteel

- All did undergrad in BME at UW-Madison
- Q: Does it matter what track in BME you pursue?
- A: Not really, BME helps you build good study habits. Also, you learn a lot about medical equipment and how they work, that serves an advantage in medical school
- Q: What other things did you do as an undergrad besides a strong academic record, and involvement that made your application stand-out?
- A: Just make sure you have something to talk about that you are passionate about, they look for interesting people. Mike-a unique thing that I did was work as a student medical assistant at UHS.
- Q: What kinds of classes do you take in med school, how do they compare to undergrad?
- A: Joseph-I found physiology and bacteriology to be very helpful, Danielle-the structure of med school is the first 2 years is dedicated to study and classes, and the last 2 years is doing rotations in all types of clinics
- Q: Joe, why did you decide to get a masters?
- A: I wasn’t sure whether or not I wanted to get my PhD, it was definitely a good experience. When going for graduate school, make sure you are doing something that you love.
- Q: How do you guys deal with the financial burden?
- A: Take out a lot of loans and apply for financial aid.
